Introduction

Research/Analysis/Finance Careers

- In this section, we include those positions that requires some degrees of technical skills such as financial analysis, economic research/analysis, advanced Excel skills, financial modeling, VBA, SQL, Stata and etc. Main employers include but not limited to: big corporations (Amazon, Intel and etc), government (Federal Reserve Bank), educational institution (University, College and etc)
- Example positions are **Business Analyst, Financial Analyst, Economic Researcher, Economic Analyst, Quantitative Analyst, Research Analyst, Research Assistant** and etc.

Sales/Marketing Careers

- In this section, positions that tends to require less technical skills but more interpersonal and communication skills are included. Main employers include but not limited to: Insurance company (New York Life), financial service company (mutual fund, wealth management and etc) and credit & Loan service company (Springleaf Financial Services)
- Example positions are **Sale Representative, Financial Advisor, Financial Service Representative, Loan Specialist, Financial Service Assistant** and etc.

Internship

- All internship available to Economic students are included in this section. Positions are NOT divided into two categories—Research/Analysis/Finance and Sale/Marketing—as the full-time positions. Internships include part-time internship, seasonal internship and full-time internship, students should pay attention to the time commitment of each different internship as well as its particular requirements.

Job/Internship Still Available:

- Internship and full-time positions, which are included in previous Work Digest Letters and still available for applications, are included in these sections.

Government Hiring:

- Government positions, for both full-time and Internship, are included in this section. Reputable government employers include but not limited to: Federal Reserve Banks, CIA, FBI and etc. Students who are interested in working for the U.S. government should pay attention to this section. (This section does NOT appear every week.)

Big Names Hiring:

- Reputable employers are included in this section (included both full-time and Internship positions). Those employers are either famous corporations, reputable educational institution or even government. Positions in this section tend to be more competitive due to great salary and benefits. Example employers are: Amazon, Google, Walt Disney, Harvard University, Federal Reserve Bank and etc.

Jobs for International students:

- Positions that are willing to consider international students are listed in the section. NOT all positions for international students are listed in this section but only those positions from reputable employers. Positions in this section are also welcome U.S. residents to apply. Additionally, employers, who are willing to consider international students, will NOT necessarily provide H1B visa to international students for full-time positions. International students should pay attention to this when they are applying.

Deadline Alert:

- Positions that are due within the one week will be included in this section. Students should pay attention to this page since positions in this page will pass quickly.

Economic Project

Introduction:

- MindSumo partners with employers to create projects that students can complete to get work experience, win prizes, and be hired for jobs and internships. Here are recent projects that are accepting students' submissions.

How would you effectively scale a large number of production databases? (\$600 Dollars in prize)

- **Partner:** Cigna
- **Description:** Here at Cigna, as we manage our 1300 production databases we care deeply about speed, security and scalability. Keep that in mind as you solve this challenge! Consider the following apps:
 1. app for uploading and sharing photos with friends
 2. app for breaking news
- **Deliverable:** As your solution, please discuss the following for each of the two apps:
 1. What is your database design - what is your schema?
 2. What scaling issues do you see with your schema? What if you had to scale to 1300 databases - what steps would you take to scale?
 3. What technologies would you use to monitor your database?

Propose a product to improve remote communication between people? (\$1000 in prizes)

- **Partner:** Logitech
- **Description:** Logitech has been making accessories that help people better interact with their technology for over 30 years, and is constantly looking for ways to give people better experiences with technology. In recent years, technological advances have greatly enhanced the ability to connect remotely located people over phone, chat, video conferencing and social media. However, there still remains a huge difference between connecting online and meeting face to face.
- **Deliverable:** 1) A written description that describes your idea (must be a physical product), the design and its functional attributes
2) An artistic rendering (drawing, diagram, mockup, etc.) of your product to show how it works
3) Explain the user experience for your idea
